

**Cornice Nr. 104 “West Riding”
(Georgian in Style)**

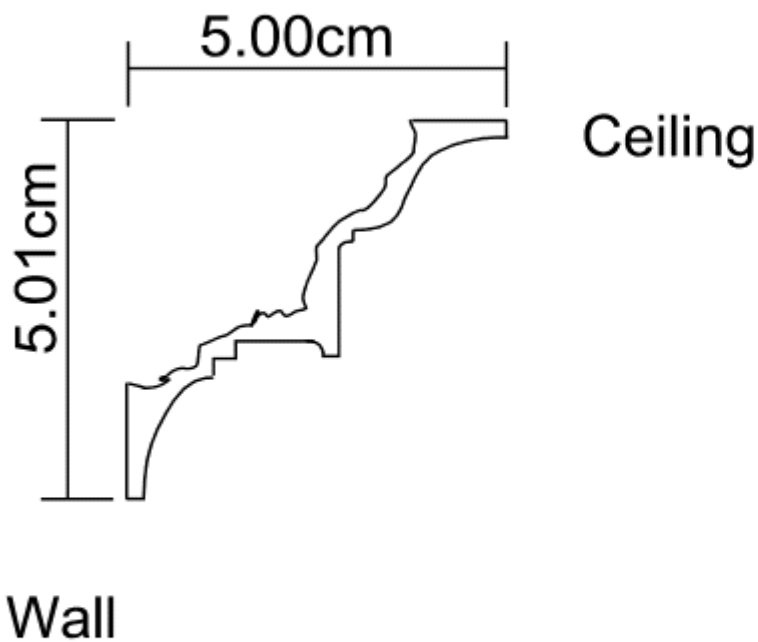

By a large margin, this is easily the smallest cornice design in the whole of our large, long established range.

In fact this pattern is about as small as it is possible to manufacture cornice moulding - I can make this claim with certainty.

Despite these observations, this profile is nevertheless Accurately Georgian in design - absolutely no members Or features have been omitted in manufacture, this Remains complete in every feature.

An approximate full size profile appears on page two of this document.

Projection 50mm. (c.2")
