

Cornice Nr. 108 “Cheshire”

A good large cove cornice. Please note “coving” is a laymans term, it is never used within our craft, in fact it is very rarely used in the construction industry for that matter!

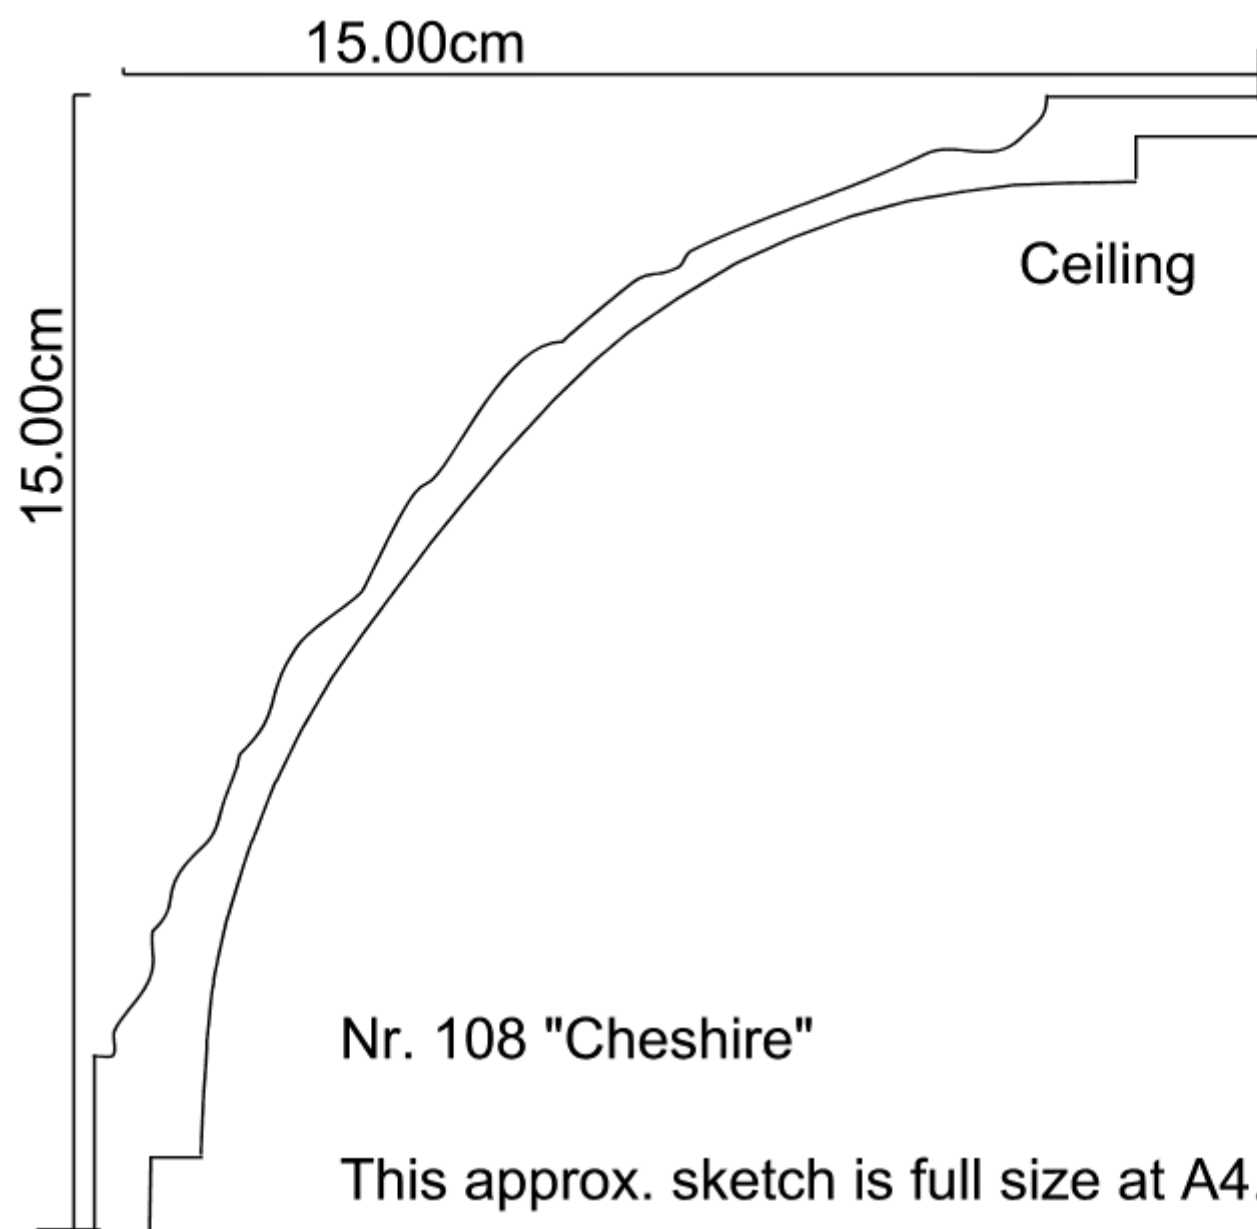

This design has been in our range for almost twenty years, was strangely originally made for an army barracks near Chester. It looked very nice with the bright pink walls for the soldiers bedroom walls!

Consider using this with high ceilings, in large areas or perhaps just use it if you like the design! Quite honestly that should be the only reason you need for selecting any design.

See also cross sectional profile on page two of this document.
