

Cornice Nr. 112
“Cambridge Egg & Dart”

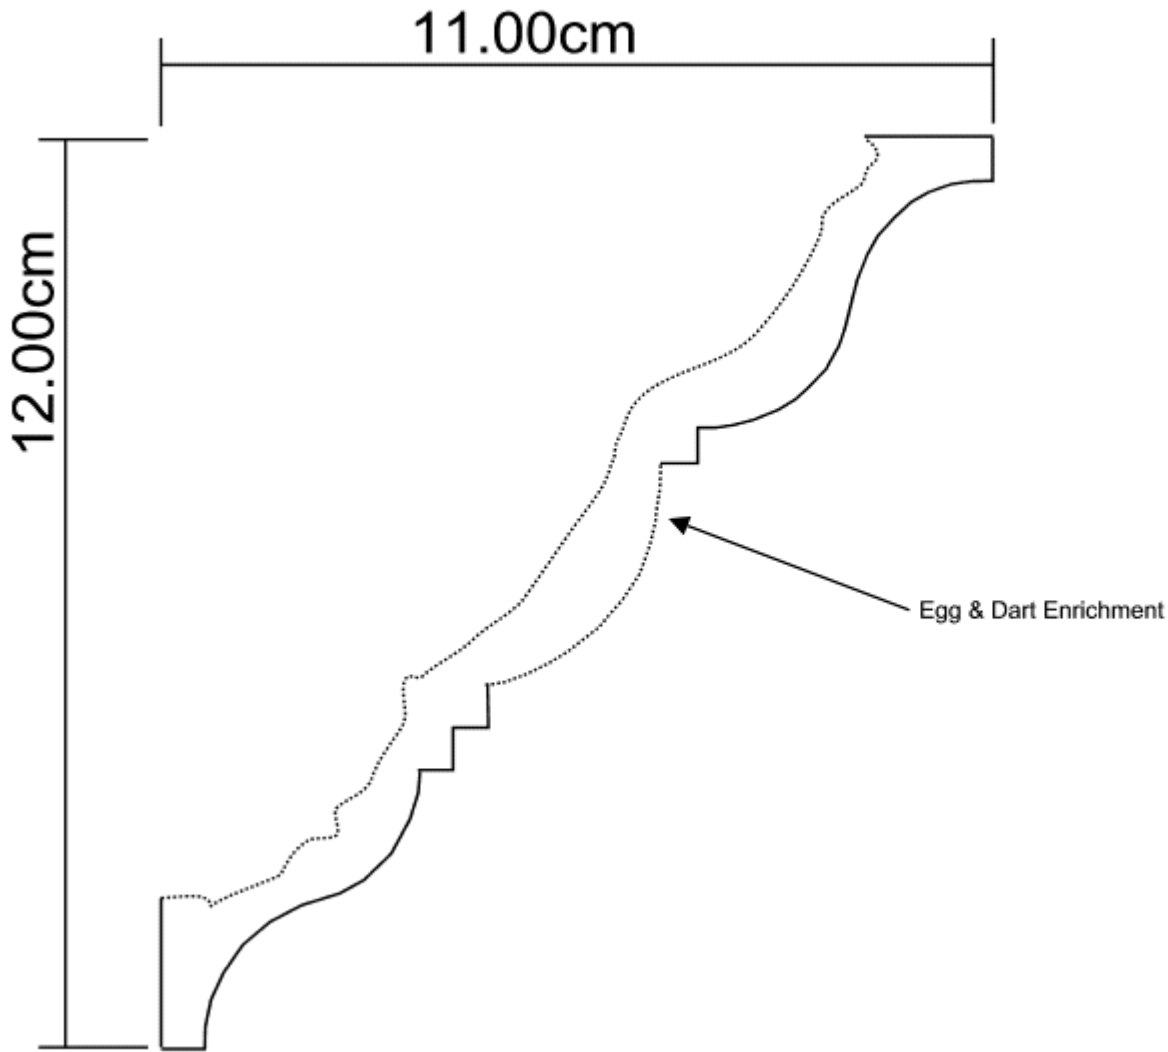

This cornice design was created because of a long bankrupt client ordered this one in error! The correct one was in fact our popular Nr. 100 “Cambridge”.

Never mind, for both have been in our standard range for more than 20 years now and both sell quite well. So that’s OK!

Page two has, for your information and guidance a full size approximate cross section of this actual pattern. As is evident there, this is indeed “average sized”, if just at the higher end.

This makes it suitable for medium to high ceilinged areas, possibly OK for the “better” diy person.

Projection 110mm. (c.4.5”)
Depth 120mm. (c.5”)
Length of Cast 3270mm. (10’8”)
Enriched, Drip Section Profile

Nr. 112 "Cambridge Egg & Dart"

A4 should produce a reasonable cross section of this cornice design.

If you are considering this pattern for your own project and are able to visit our works, please ask to see a complete area that we have installed. It is actually quite a high ceiling - but it does suit it.
