

Cornice Nr. 119 “Alhambra”

(Islamic in Style)

Another unusual cornice, this is obviously an Islamic design. While it seems to be a fairly large cornice, it doesn't project onto the ceiling very much, nor is it very deep down the wall. In brief, it is actually quite a small cornice!

However this design is best not installed in a complex area, best one chooses a simple rectangle as mitres are frankly terribly difficult to execute. We suggest exact room dimensions are taken - then we will make it specially for your home or premises.

Please don't let the above put you off purchasing because it really is A fabulous, fancy cornice design.
