

## Cornice Nr. 129 “Düsseldorf Cove”

Another thoroughly modern cornice, however this one has sufficient orthodox / normal features to pass for a traditional design of cornice moulding.

It is certainly “average sized” , is also a reasonably straightforward design to attempt as a “self install” venture for the patient amateur installer. But even so, please do pay careful regard to the extensive notes on the “DIY” page of this web site and please Also appreciate that the “first timer” is unlikely to reach the professional standard of our full time craftsmen.

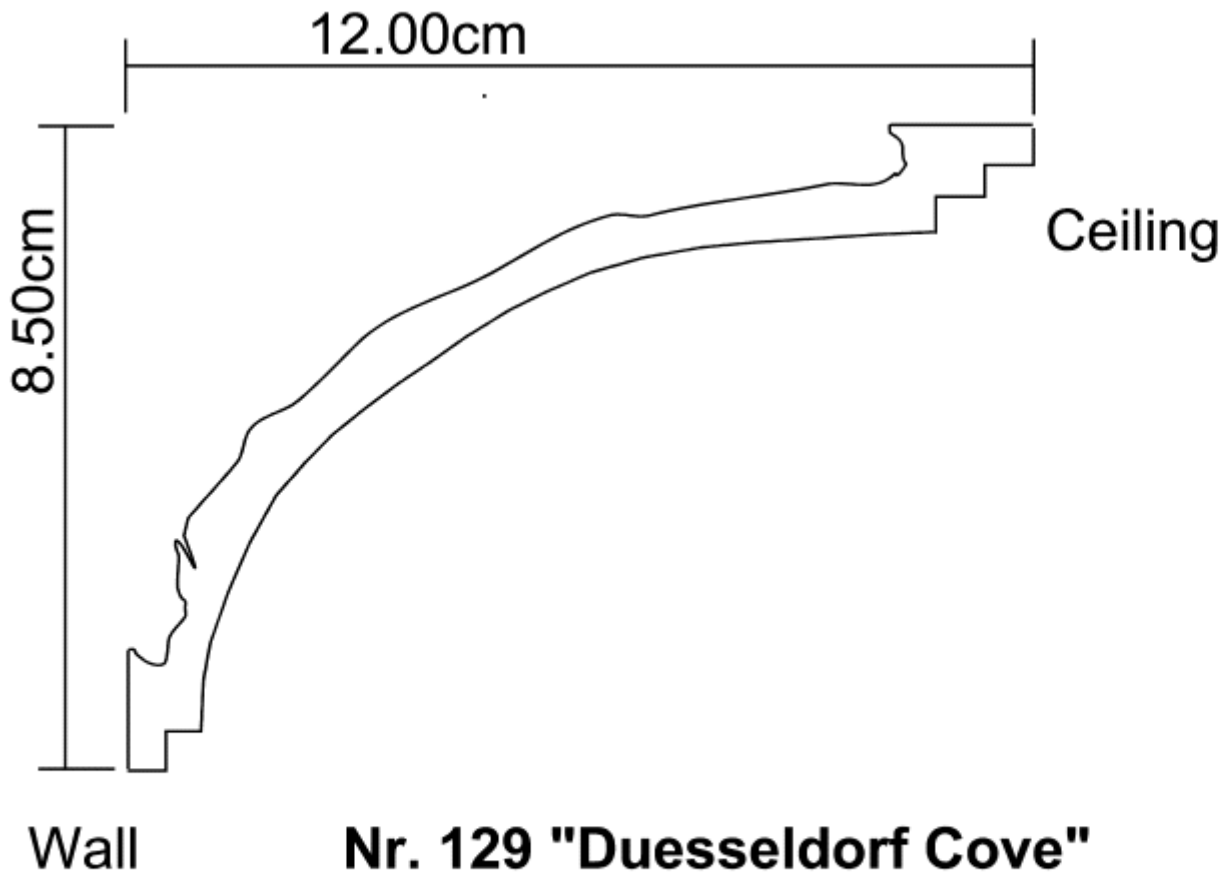

Please regard the cross sectional sketch on page two - this document and do ask our staff any questions you wish.

**Projection 120mm. (c.5”)**

**Depth 85mm. (c.3.5”)**

**Length of Cast 3290mm. (10’9”)**

**Plain Run Section**

Approximately full size when reproduced to A4 format / page size.

Actual pattern of cornice can be viewed first hand at our showroom in Dewsbury, Yorkshire where we have a small, 1.0 metre rectangular bay of this very design installed.
