

## Cornice Nr. 136 “Bamberg”

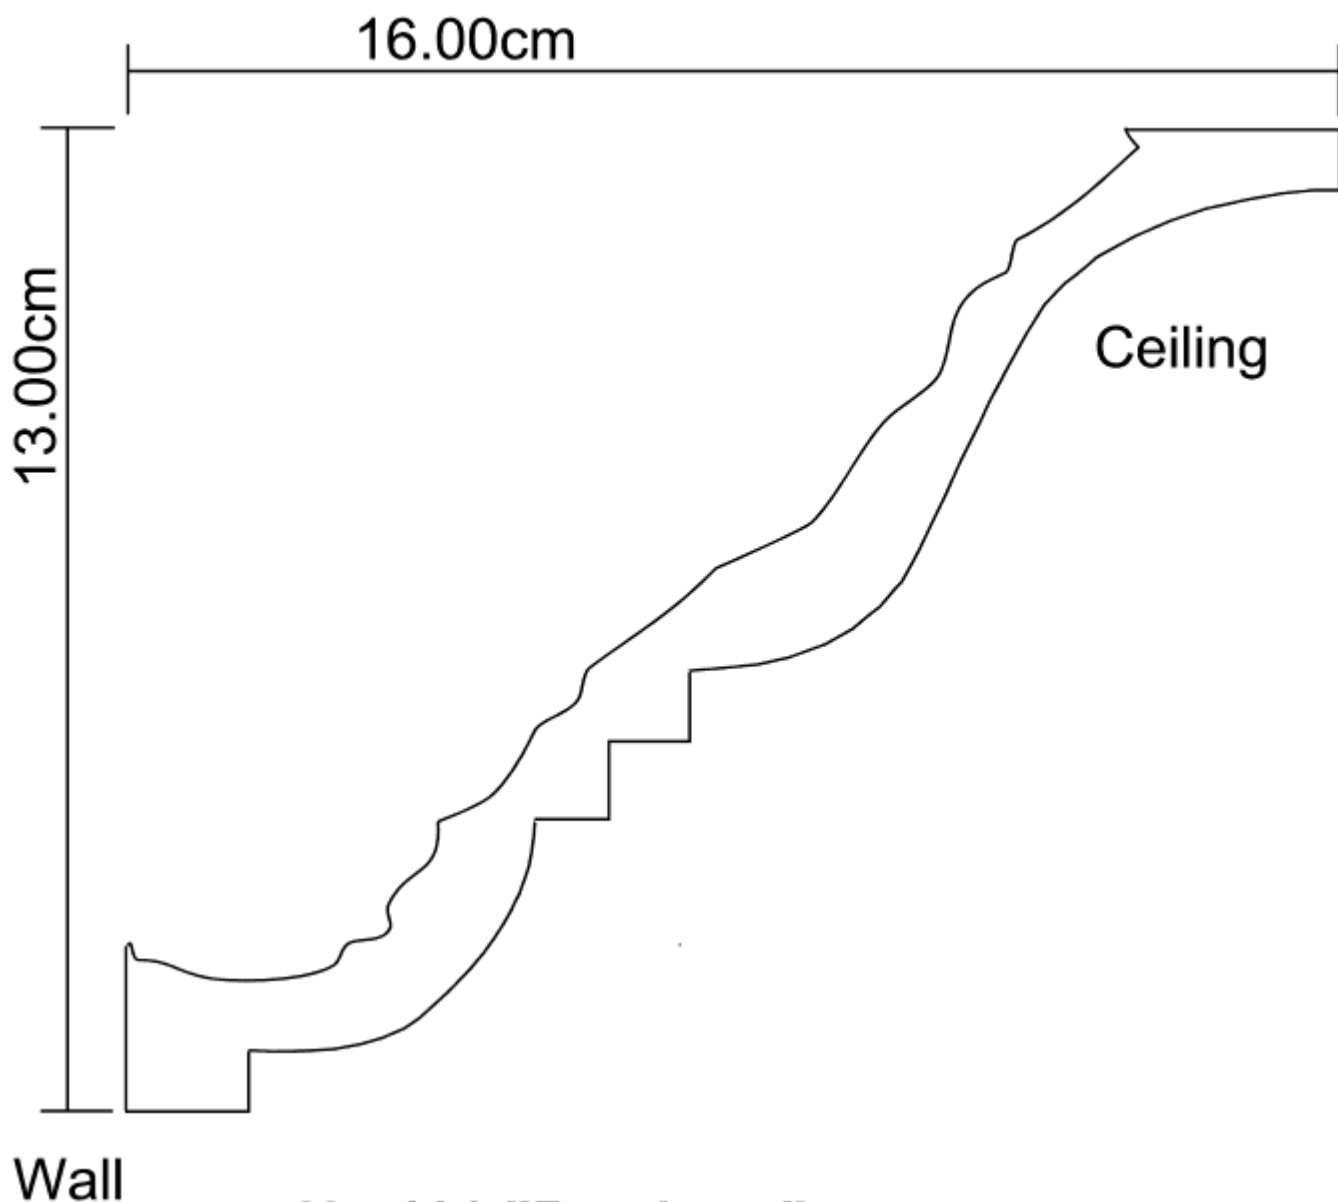

This design is larger than most. It is also quite a favourite of mine, I really like the design and proportions of it - to me it seems to be solid with genuinely strong lines that add some “beef” to any area where it is fitted.

It is not from any apparent period or era, it’s probably correct to call this a relatively modern design. We were originally commissioned to produce and fit this into some public areas of a newly built five star hotel in a northern English city.

While this image is quite good, please do also consult the full size cross section on page two of this document, also possibly an actual example of it that we keep for your reference at our workshops.

**Projection 160mm. (c.6.5”)**  
**Depth 130mm. (c.5”)**  
**Length of Cast 3250mm. (10’8”)**  
**Plain Run Section**

### **Nr. 136 "Bamberg"**

Full size at A4. Approximate for proportions only - please remember this is merely an approximate representation only, for your guidance.

The real thing, a sample piece of this cornice is available for your view at our premises.
