

Cornice Nr. 185 “Egg & Dart”

A fairly small cornice design, quite a popular pattern with our many domestic clients. This cornice is often installed into newly built or other modern homes.

This is, obviously an egg and dart enriched cornice. However an interesting but little known fact of this design is it's origin. Greek in design, it represents “life and death” -the egg of birth, the dart of death, geddit?

It's robust cross section makes this pattern more suitable than most for amateur installation. This task still requires care, patience and preparation, but it is possible for a novice to make a passable job of fixing this moulding. It will be very helpful to refer to our “diy” Page on this web site.

Please also look at page two of this sheet for the cross sectional details.
